## Calbindin D-28K Antibody

Catalog #	24427	Product type	Primary antibodies
Lot #	1803001	Clonality	Polyclonal
Form	Lyophilized whole serum (100 µL)	Isotype	IgG
Host	Rabbit	Preservative	≤ 0.09% sodium azide
Reacts With	Mouse, Rat	Antigen	Calbindin D-28K purified from bovine cerebellum.

## **INSTRUCTIONS**

Preparation	Do not reconstitute until ready to use since the product is most stable when lyophilized. The product does not need to be kept cooled during shipping; however for long-term storage, store lyophilized antibody until ready to use at -15°C or lower. Reconstitute with 100 µL of distilled or deionized water. After reconstitution, use immediately or refrigerate at 2°–8°C. To avoid freeze/thaw cycles, dilute unused antibody with PBS or Tris buffer at a dilution no higher than 1/10, then aliquot and freeze at -15°C or lower.
	Refer to the Instruction Manual available online at www.immunostar.com for information on tissue preparation, immunostaining techniques, troubleshooting, and formulas.

## **APPLICATION**

IHC Quality Control	The antibody has significant biotin-avidin/HRP and indirect immunofluorescence staining at a 1/10,000 – 1/15,000 dilution in rat striatum, cortex, and hippocampus. The antiserum has been characterized as specific to calbindin D-28k; please see reference listed below. Optimal dilution will vary depending upon fixation, labeling technique and/or detection system; therefore, a dilution series is recommended.	
Tissue	Rat striatum, hippocampus, and cortex	
Perfusion Fixation	<ul> <li>Fixative: 4% paraformaldehyde in 0.1M Phosphate buffer, pH 7.4; 500 mL over 20 min.</li> <li>Post fixation: 1.5 hour at 4°C in 4% paraformaldehyde in 0.1M phosphate buffer, pH 7.4.</li> <li>Note: If needed, low levels of glutaraldehyde (0.1–0.3%) may be used in conjunction with paraformaldehyde.</li> </ul>	
Sections	10 μm cryostat or 50 μm vibratome	
Tissue Incubation	18–24 hours at 2°–8°C.	
Detection System	Use Cy3 or Bn/Av-HRP according to manufacturer's directions.	
Suggested Dilution	1/10,000–1/15,000 in PBS/0.3% Triton X-100 - Bn-SA/HRP immunohistochemistry	

## **NOTES**

Special Instructions	It is recommended that the researcher perform a primary antibody dilution series using our dilution recommendations as a guideline. Note that a change in the fixation or buffering system from our protocol may change the configuration of the protein which could alter the reactivity with the tissue tested.	
Storage	After reconstitution, use immediately or refrigerate 2°–8°C up to 2 days. For long-term storage, aliquot antibody and freeze at -15°C or lower. Avoid repeated freeze/thaw cycles.	
Concentration	Not applicable. Antibody concentration is only relevant for purified antibodies.
