

**BOC-Statine [BOC-Sta(3S,4S)-OH] *CAS
58521-49-6***Catalog number: 5100, 5101
Unit size: 1 g, 10 g**Product Details**

Storage Conditions	Freeze (<-15 °C)
Expiration Date	12 months upon receiving

Chemical Properties

Appearance	Solid
Molecular Weight	275.34
Soluble In	DMF
Chemical Structure	

**Applications**

(3S,4S)-Statine is a novel amino acid of pepstatin, a low molecular weight inhibitor of acid proteases. This BOC-Statine building block is a very useful precursor for preparing protease-resistant peptide for pharmaceutical application using the standard BOC chemistry.
