Applications

1X4 Color™ B488 Dye Set provides a set of highly fluorescent dyes for multicolor applications. All the 4 dyes of this set are well excited with the Argon laser (488 nm) with 4 distinct emissions around 520, 560, 590 and 630 nm respectively. This unique dye set enables the development of fluorescence instruments and devices with a single laser (e.g., Argon laser or a LED) for multicolor detections.
