ichorbio's anti-human iNKT cell antibody (6B11) is manufactured in a cGMP compliant, ISO Quality Standard 9001:2015 facility. ichorbio's low endotoxin antibodies have half the endotoxin of comparable antibodies from Bio

X Cell at less than 1.0 EU/mg. If ichorbio's low endotoxin antibodies are not low enough we also offer ultra low endotoxin antibodies which have even less endotoxin (0.5EU/mg) at an even higher purity (98% versus 95%). ichorbio: the best antibodies for <i>in vivo</i> research.

# **Background:**

Encoded by the TCR V alpha 24-J alpha 18 germline configuration, V alpha 24-J alpha Q is expressed on a subset of NKT cells, namely invariant NKT (iNKT). V alpha 24-J alpha Q TCR interacts with the glycolipid loaded MHC class 1b molecule CD1d, inducing activation and subsequent cytokine production.
